JOURNAL OF THE ROYAL STATISTICAL SOCIETY (SERIES C)

Editorial Board

C. CHATFIELD
Joint Editor

P. SPRENT
Joint Editor

J. A. NELDER
Chairman

C. J. CLARK

B. E. COOPER

R. D. ELSTON

I. D. HILL
Algorithm Editor

J. LUCKMAN

W. S. PAIGE

E. JOYCE SNELL

D. N. SPARKS
Review Editor

D. H. WARD

G. WATTS

Applied Statistics

CONTENTS

Volume 24, 1975

No. 1

		Page
Likelihood analyses and tests for binary data	*J. K. Lindsey*	1
A statistical analysis of Association-football attendances	*R. A. Hart, J. Hutton and T. Sharot*	17
Maximum likelihood estimation of a linear regression function with grouped data	*R. J. Pethybridge*	28
A regression assessment statistic	*J. R. Scott*	42
Analysis of interactions in incomplete two-way tables	*G. H. Freeman*	46
Critical values of a test to detect outliers in factorial experiments	*J. A. John and P. Prescott*	56
Row-and-column designs	*S. C. Pearce*	60
A multiplicative model for the analysis of vital statistics rates	*J. Osborn*	75
A logit model for infectious diseases	*M. Crowder and P. R. Grob*	85
Probability plotting methods and order statistics	*V. Barnett*	95
Taylor series linearization and scoring for parameters in nonlinear regression	*D. A. Ratkowsky and G. R. Dolby*	109
A comparison of Gaussian and logistic categorical opinion distribution models	*J. McKenzie*	112
Tables of cumulative distribution functions for symmetric stable distributions	*G. J. Worsdale*	123
Correction		41
Miscellanea		
On using the Box-Muller transform with congruential pseudo-random number generators	*S. C. Chay, R. D. Fardo and M. Mazumdar*	132
A simple method of drawing a sample without replacement	*A. C. Bebbington*	135
Stochastic models to describe the fertilization of an egg	*R. W. Morgan*	136
Book Reviews		
Biometrical Interpretation. By *N.E. Gilbert*		139
Méthodes et Programmes d'Analyse Discriminate. By *Jean-Marie Romeder*		139
Statistical Thinking: a Structural Approach. *By J. L. Phillips*		140
Market Segmentation. By *R.E. Frank, W. F. Massey and Y. Wind*		141
Exeter—University and City. By *F. M. M. Lewes and Anne Kirkness*		142
Spatial Autocorrelation. By *A. D. Cliff and J. K. Ord*		142
*Statistical Alogorithms AS*80–*AS*83		
AS80 Spherical statistics *K. V. Mardia and P. J. Zemroch*; AS81 Circular statistics *K. V. Mardia and P. J. Zemroch*; AS82 The determinant of an orthogonal matrix *J. C. Gower*; AS83 Complex discrete fast Fourier transform *D. M. Monro*; ASR13 A remark on AS58 *D. N. Sparks*		144

No. 2

Assessment of multinormality and the robustness of Hotelling's T^2 test	*K. V. Mardia*	163
A reliability model for systems with Markov structure	*B. Littlewood*	172
Significance testing in automatic interaction detection	*G. V. Kass*	178
Estimating missing values in experiments	*J. A. John and P. Prescott*	190
The analysis of permutations	*R. L. Plackett*	193
A non-parametric test for Hertzian fracture data	*J. A. Bather*	203
A simple alternative to Student's *t*	*P. Prescott*	210
The effect of ethical design considerations on statistical analysis	*D. V. Lindley*	218
Quantifying radiological changes in simple pneumoconiosis	*M. Jacobsen*	229
Miscellanea		
Multicollinearity caused by specification errors	*M. Z. Fabrycy*	250

CONTENTS

No. 2 (cont'd)

Page

The derivation of the theoretical autocovariance function of autoregressive-moving average time series *I. McLeod* 255
The interpretation of rank correlations *D. Kerridge* 257

Announcement
Working Party on Statistical Computing: Project on Generalized Linear Models (GLIM) 259

Statistical Algorithms AS84–AS87
AS84 Measures of multivariate skewness and kurtosis *K. V. Mardia and P. J. Zemroch*; AS85 Critical values of the sign test *J. Bukac*; AS86 The von Mises distribution function *K. V. Mardia and P. J. Zemroch*; AS87 Calculation of the polychoric estimate of correlation in contingency tables *E. O. Martinson and M. A. Hamdan* 262

No. 3

The determination of the optimum position on a ballot paper *G. J. G. Upton and D. Brook* 279
Exploring interaction effects in the Anova *M. B. Brown* 288
Some new goodness-of-fit tests using order statistics *Y. A. S. Hegazy and J. R. Green* 299
The one-compartment open model: some statistical aspects of parameter estimation *B. E. Rodda, C. B. Sampson and D. W. Smith* 309
Estimation in a modified binomial distribution *M. C. Carter and W. O. Williford* 319
Divination in Ancient China *D. Robinson* 329
A simulation study of the estimation of evolutionary spectral functions *W.-Y. T. Chan and H. Tong* 333
A supplementary note on the use of cluster analysis for stratification *R. M. Heeler and G. S. Day* 342
Further observations on the stratification of Birmingham wards by clustering: a riposte *K. A. Yeomans and P. A. Golder* 345

Correction 308

Miscellanea
A note on L_1 estimation based on the median positive quotient *G. F. McCormick and V. A. Sposito* 347
MAD: an analysis of variance program for unbalanced designs *G. R. Bryce* 350
On the disaggregation of annual time series data *D. W. Balmer* 352
Modifications of the angular transformation *D. O. Chanter* 354

Book Reviews
Tables for Bayesian Statisticians. By *G. L. Isaacs* 360
Demographic Data Collection. By *W. Seltzer* 361
Time Series. By *M. G. Kendall* 361
Uncertainty, Calibration and Probability. By *C. F. Dietrich* 362
An MMPI Source Book. Basic Item, Scale and Pattern Data on 50,000 Medical Patients. By *W. M. Swenson, J. S. Pearson and D. Osborne* 363
Systems Analysis and Design using Network Techniques. By *G. E. Whitehouse* 363
Quality Control and Industrial Statistics. By *A. J. Duncan* 364

The Construction and Description of Algorithms 366

Statistical Algorithms AS88–AS92
AS88 Generation of all ${}_NC_R$ combinations by simulating nested Fortran DO loops *Jane F. Gentleman*; AS89 The upper tail probabilities of Spearman's *rho D. J. Best and D. E. Roberts*; AS90 One-sided multi-variable inference *R. Bohrer*; AS91 The percentage points of the chi-squared distribution *D. J. Best and D. E. Roberts*; AS92 The sample size for a distribution-free tolerance interval *P. Brooker and M. J. P. Selby*. Correction to AS 78, 374

List of *Applied Statistics* Algorithms 391
